Hello World
Lab 0

Code

Complete the program we started in class by altering the source code to print out: "Hello World! My name is [insert your name]." Make sure to have run the program to make sure that there are no errors in your code.

Comment

You should comment (using the double back slashs) EVERY line of your program to explain what you know about it and make sure to put your name (commented) at the very top of the program so that your work can be graded.

Submit

Submit your program to Google Classroom. Make sure to submit the .java file of your project to google classroom not the .class or any of the other associated files.
